PROFESSIONAL SUMMARY

Senior frontend engineer, 8+ years shipping products at scale — React/TypeScript/Next.js expert. Independently built and scaled a live SaaS platform to 650+ active users (65+ routes, 8 releases, 23 zero-downtime migrations), architecting the backend with Claude Code as an AI engineering partner. Modernized a 1M-MAU flight booking platform at tiket.com (Next.js migration, ~50% page-load improvement) and architected banking journeys at Paytm.

TECHNICAL SKILLS

Frontend Core	React, Next.js, TypeScript, ES6+ JavaScript, HTML5, CSS3, responsive design, mobile-first, Core Web Vitals
Design Systems & UX	Component libraries, design system architecture, Figma integration, pixel-perfect UI, accessibility (WCAG)
Backend (AI-Assisted)	Node.js, Express, REST APIs, PostgreSQL — implemented with Claude Code as an AI engineering partner
AI-Assisted Development	Claude Code, Claude APIs, agentic workflows, MCP protocols, prompt engineering, Cursor AI, GitHub Copilot
Testing & Quality	Unit & integration testing, CI/CD (GitHub Actions), code reviews, clean code practices, 90% coverage gates
Product & Analytics	PostHog analytics, A/B testing, user feedback loops, metrics-driven iteration, cross-functional collaboration
DevOps & Infrastructure	GitHub Actions, CI/CD pipelines, Docker (working level), Vercel, cloud-native architecture
Cross-Functional Collaboration	Code reviews, technical mentorship, architecture decisions, stakeholder communication, team standards

PROFESSIONAL EXPERIENCE

Solo Engineer Her Aviation Era heraviationera.com Architecture deep dive Remote	<i>Jan 2026 – Present</i>
Built and scaled Her Aviation Era (Jan 2026–Present) into a live SaaS platform serving 650+ active users — architecting the frontend directly and implementing the backend with Claude Code as an AI engineering partner, while incorporating user feedback into the roadmap.	
- Grew the platform to 650+ active users across 65+ routes and 24 API endpoints, shipping 8 versioned releases and 23 zero-downtime production migrations over 7 months of sustained iteration. - Built the full product suite end-to-end: Interview Question Bank (150+ questions), Study Hub, English Proficiency Test, Group Discussion prep, CV Templates, and a 6-tool Aptitude/Grooming toolkit — each shaped by direct user feedback and usage analytics (PostHog). - Architected the React/Next.js frontend directly and implemented the Node.js/PostgreSQL backend with Claude Code as an AI engineering partner — including a multi-gateway payment system (Stripe, PayPal, Razorpay; USD/INR) and freemium gating across 15+ surfaces. - Automated CI/CD via GitHub Actions across 8 versioned releases and secured the platform with Postgres RLS across all 24 API endpoints, GDPR-aligned deletion, and 3-2-1 encrypted daily backups — while collaborating with early users to shape the roadmap.	

Senior Frontend Engineer
tiket.com | Jakarta, Indonesia

Feb 2022 – Dec 2025

Flight & Ground Transport (Flight, Train, Bus, Car Rental, Ferry)

- Spearheaded end-to-end revamp of the Flight product, migrating legacy React services to Next.js and TypeScript with a fully responsive design, supporting ~1 million monthly active users.
- Delivered online check-in across 2 in-app WebView platforms (iOS, Android) and web, improving the experience for airline customers.
- Improved page performance and resolved critical bugs across 4 service modules (bus, train, ferry, airport).
- Debugged and optimized WebView implementations across 2 platforms (iOS, Android simulators) for consistent cross-platform behavior.

Things To Do (TTD) — Entertainment Ticket Services

- Migrated the legacy codebase to TypeScript, improving code quality, maintainability, and developer productivity.
- Refactored and migrated TTD to Next.js, achieving ~50% improvement in page load times.
- Supported high-demand event ticket launches for concerts and sports events with rapid issue resolution.

Tiket Live — In-House Live Streaming Application

- Developed and launched Tiket Live and Video-on-Demand (VoD) products using Next.js, optimized for in-app WebViews.
- Collaborated cross-functionally to integrate modules across verticals for a unified user experience.

AI-Driven Development Initiatives

- Pioneered team-wide adoption of 2 AI development tools (Cursor AI, GitHub Copilot) and 4 MCP integrations (Figma, GitHub, JIRA, Chrome DevTools).
- Reduced component and Figma design implementation time from days to hours using MCP servers for Figma, GitHub, JIRA, and Chrome DevTools.
- Led initiatives to streamline engineering workflows and productivity through AI-powered automation.

Senior Software Developer
Paytm Payments Bank | Noida, India

Sep 2021 – Jan 2022

- Architected the full digital journey for Current Accounts using React.js on the Paytm Bank consumer app.
- Implemented a Node.js API layer between frontend and backend to enhance security via server-to-server architecture.
- Established coding standards and frontend architecture for banking applications.

Software Developer
Paytm | Noida, India

Feb 2018 – Aug 2021

- Developed shared modules for the Paytm Bank App, the primary consumer banking application built on React.js, including storefront banner functionality for user offers and promotions.
- Built an Asset Tracking System using React and Redux to track operational assets via barcode assignment, and a merchant onboarding flow for loan applications with document upload and selfie capture.
- Developed features across 5 Paytm verticals (Movies, BoxOffice, FSM, BPMS, Seller Panel), including ticket printing/report generation and a Node.js authorization server (Panel BFF) for cross-panel authentication.

Software Developer
Qorql Pvt Limited | India

Feb 2017 – Jan 2018

- Implemented an event-based queue management system using push notifications (FCM) and Firebase real-time database.
- Developed an admin panel for centralized management of applications and database updates.

EDUCATION

Master of Computer Applications (MCA) — Guru Gobind Singh Indraprastha University, Delhi | 72%
Bachelor of Computer Applications (BCA) | 80%
