PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years building scalable web applications in Next.js, React, TypeScript, and Node.js for travel, fintech, and entertainment platforms serving millions of users. Most recently, founded and solo-shipped **Her Aviation Era**, a live production SaaS product (~150 active users) — owning the entire lifecycle from architecture and full-stack development to CI/CD, database migrations, security, and DevOps, using Claude (Anthropic) as an AI engineering partner across the full software development lifecycle. Combines deep enterprise frontend expertise with hands-on founder-level ownership of product, backend, and infrastructure — well suited to remote, high-autonomy engineering roles.

TECHNICAL SKILLS

Frameworks & Libraries	Next.js, React.js, Redux, Node.js
Languages	JavaScript, TypeScript, HTML5, CSS3, SASS, SQL (PostgreSQL)
Cloud, Data & DevOps	Supabase (Postgres, RLS, Auth), Vercel, GitHub Actions (CI/CD), Firebase, GCM
Payments & Growth	Stripe, PayPal, Razorpay, PostHog, Microsoft Clarity
AI-Augmented Engineering	Claude Code / Claude Agent SDK, Cursor AI, GitHub Copilot, MCP Servers (Figma, GitHub, JIRA, Chrome DevTools)
Mobile & Platforms	iOS Simulator, Android Simulator, WebView Debugging, Git, Webpack, Babel, JIRA
Specializations	Full-Stack Product Architecture, Performance Optimization, Security (RLS/Auth), Responsive Design, WebView Integration

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Engineer Her Aviation Era heraviationera.com Architecture deep dive Remote	Jan 2026 – Present
Founded and solo-built a live production SaaS platform for aviation-industry aspirants, currently serving ~150 active users, acting as sole architect, engineer, and product owner across the full stack.	
- Designed and built the entire product end-to-end on Next.js, React, TypeScript, and Supabase (PostgreSQL) — covering authentication, booking/scheduling, content delivery, and a member dashboard. - Directed the full software development lifecycle — product scoping, architecture, implementation, testing, deployment, and DevOps — in close AI-augmented collaboration with Claude (Anthropic), demonstrating advanced human-AI pair-engineering practice for shipping production software as a team of one. - Architected a freemium monetization model with tiered feature gating across 15+ product surfaces, and integrated three global payment gateways (Stripe, PayPal, Razorpay) to support both USD and INR billing. - Built a governed two-environment release pipeline (staging → production) with gated CI/CD via GitHub Actions, automated database migration checks, and an expand/contract schema strategy for zero-downtime changes. - Owned application security and data protection: audited and closed Postgres Row-Level Security gaps, implemented GDPR-aligned account deletion, and stood up a 3-2-1 encrypted backup/disaster-recovery pipeline running daily. - Instrumented product analytics (PostHog, Microsoft Clarity) and cookie consent to drive data-informed decisions on activation and conversion. - Shipped 10+ major features solo, including an admin-managed booking/availability system, an AI-assisted interview-prep bank (150+ questions), a CV template store, and an admin analytics console with revenue reporting.	

Senior Frontend Engineer
tiket.com | Jakarta, Indonesia

Feb 2022 – Dec 2025

Flight & Ground Transport (Flight, Train, Bus, Car Rental, Ferry)

- Spearheaded end-to-end revamp of the Flight product, migrating legacy React services to Next.js and TypeScript with a fully responsive design, supporting ~1 million monthly active users.
- Delivered online check-in for web and in-app WebViews, improving the experience for airline customers.
- Improved page performance and resolved critical bugs across bus, train, ferry, and airport service modules.
- Debugged and optimized WebView implementations on iOS and Android simulators for consistent cross-platform behavior.

Things To Do (TTD) — Entertainment Ticket Services

- Migrated the legacy codebase to TypeScript, improving code quality, maintainability, and developer productivity.
- Refactored and migrated TTD to Next.js, achieving ~50% improvement in page load times.
- Supported high-demand event ticket launches for concerts and sports events with rapid issue resolution.

Tiket Live — In-House Live Streaming Application

- Developed and launched Tiket Live and Video-on-Demand (VoD) products using Next.js, optimized for in-app WebViews.
- Collaborated cross-functionally to integrate modules across verticals for a unified user experience.

AI-Driven Development Initiatives

- Pioneered team-wide adoption of AI development tools (Cursor AI, GitHub Copilot) and MCP integrations.
- Reduced component and Figma design implementation time from days to hours using MCP servers for Figma, GitHub, JIRA, and Chrome DevTools.
- Led initiatives to streamline engineering workflows and productivity through AI-powered automation.

Senior Software Developer
Paytm Payments Bank | Noida, India

Sep 2021 – Jan 2022

- Architected the full digital journey for Current Accounts using React.js on the Paytm Bank consumer app.
- Implemented a Node.js API layer between frontend and backend to enhance security via server-to-server architecture.
- Established coding standards and frontend architecture for banking applications.

Software Developer
Paytm | Noida, India

Feb 2018 – Aug 2021

- Developed shared modules for the Paytm Bank App, the primary consumer banking application built on React.js, including storefront banner functionality for user offers and promotions.
- Built an Asset Tracking System using React and Redux to track operational assets via barcode assignment, and a merchant onboarding flow for loan applications with document upload and selfie capture.
- Developed features across multiple Paytm verticals (Movies, BoxOffice, FSM, BPMS, Seller Panel), including ticket printing/report generation and a Node.js authorization server (Panel BFF) for cross-panel authentication.

Software Developer
Qorql Pvt Limited | India

Feb 2017 – Jan 2018

- Implemented an event-based queue management system using push notifications (FCM) and Firebase real-time database.
- Developed an admin panel for centralized management of applications and database updates.

EDUCATION

Master of Computer Applications (MCA) — Guru Gobind Singh Indraprastha University, Delhi | 72%

Bachelor of Computer Applications (BCA) | 80%
